MULTIPLE DISC BRAKE (SAE A size)

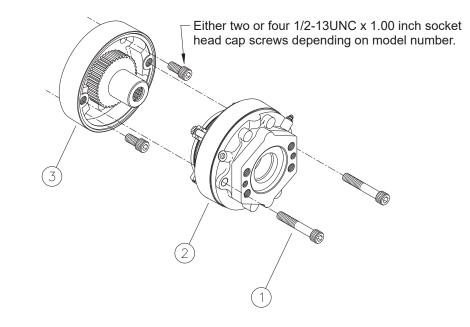

Mounting Instructions

MOUNTING PROCEDURE

- 1. Remove two socket head cap screws (1) and separate cover/shaft assembly (3) from brake module (2).
- 2. Attach gasket to cover/shaft assembly (3) and, depending on brake module, install on gearbox using either two or four 1/2-13UNC x 1.00 inch socket head cap screws, not provided. Torque 108-122 N·m (80-90 lb·ft).
- 3. Lubricate threads on socket head cap screw (1) and carefully assemble brake module (2) to cover/shaft assembly (3). Torque 108-122 N·m (80-90 lb·ft).

ACAUTION

Care must be taken to assure cover/shaft assembly (3) and brake module (2) are seated properly prior to installing socket head cap screws (1). Damage will occur to rotor stack or shaft snap ring if not properly seated.
